Tire Science and Technology Keyword Index to Volume 35 2007

ABAQUS
  Load and Inflation Effects on Force and Moment of Passenger Tires Using Explicit Transient Dynamics (Hon H. Liu), 41–55 (2007)
acoustics
  Computational Model to Investigate the Sound Radiation from Rolling Tires (Jan Biermann, Otto von Estorff, Steffen Petersen, and Holger Schmidt), 209–225 (2007)
adhesion
  Basic Study of PK Fiber Tire Cord (Yugo Zuigyo and Masahiko Yamamoto), 317–325 (2007)
aging
  Numerical Model for Nitrogen Tire Inflation (Kevin R. J. Ellwood, John Baldwin, and David R. Bauer), 300–316 (2007)
arbitrary Lagrangian Eulerian
  A Finite Element Approach to the Transient Dynamics of Rolling Tires with Emphasis on Rolling Noise Simulation (Maik Brinkmeier, Udo Nackenhorst, and Heiner Volk), 165–182 (2007)
automotive fuel economy
  A Commented Synopsis of the Report of the Committee for the National Tire Efficiency Study (Marion G. Pottinger, Joseph D. Walter, and John D. Eagleburger), 70–93 (2007)
body ply
  Basic Study of PK Fiber Tire Cord (Yugo Zuigyo and Masahiko Yamamoto), 317–325 (2007)
cap ply
  Basic Study of PK Fiber Tire Cord (Yugo Zuigyo and Masahiko Yamamoto), 317–325 (2007)
coast-down
  Fidelity of J1269 and J2452 (James A. Popio and John R. Luchini), 94–117 (2007)
coefficient of restitution
  Tire Energy Loss from Obstacle Impact (Timothy B. Rhyne and Steven M. Cron), 141–161 (2007)
contact
  Load and Inflation Effects on Force and Moment of Passenger Tires Using Explicit Transient Dynamics (Hon H. Liu), 41–55 (2007)
crack speed
  Dynamic Fracture of Natural Rubber (Ali A. Al-Quraishi and Michelle S. Hoo Fatt), 252–275 (2007)
cyclic symmetry
  Validation of a Steady-State Transport Analysis for Rolling Treaded Tires (J. Qi, J. R. Herron, K. H. Sansalone, W. V. Mars, Z. Z. Du, M. Snyman, and H. Surendranath), 183–208 (2007)
diffusion-limited oxidation
  Numerical Model for Nitrogen Tire Inflation (Kevin R. J. Ellwood, John Baldwin, and David R. Bauer), 300–316 (2007)
durability simulation
  Inelastic Fracture Mechanics for Tire Durability Simulations (Michael Kaliske, Bastian Näser,

  Numerical Model for Nitrogen Tire Inflation (Kevin R. J. Ellwood, John Baldwin, and David R. Bauer), 300–316 (2007)
durability simulation
  Inelastic Fracture Mechanics for Tire Durability Simulations (Michael Kaliske, Bastian Näser,

and Christian Meiners), 239–250 (2007)
dynamic fracture
Dynamic Fracture of Natural Rubber (Ali A. Al-Quraishi and Michelle S. Hoo Fatt), 252–275 (2007)
energy policy
A Commented Synopsis of the Report of the Committee for the National Tire Efficiency Study (Marion G. Pottinger, Joseph D. Walter, and John D. Eagleburger), 70–93 (2007)
Eulerian
Validation of a Steady-State Transport Analysis for Rolling Treaded Tires (J. Qi, J. R. Herron, K. H. Sansalone, W. V. Mars, Z. Z. Du, M. Snyman, and H. Surendranath), 183–208 (2007)
explicit FEM
Prediction of Tread Pattern Wear by an Explicit Finite Element Model (J. C. Cho and B. C. Jung), 276–299 (2007)
explicit transient dynamics
Load and Inflation Effects on Force and Moment of Passenger Tires Using Explicit Transient Dynamics (Hon H. Liu), 41–55 (2007)
fatigue resistance
Basic Study of PK Fiber Tire Cord (Yugo Zuigyo and Masahiko Yamamoto), 317–325 (2007)
finite element analysis
Finite Element Analysis of Nonuniformity of Tires with Imperfections (K. M. Jeong, K. W. Kim, H. G. Beom, and J. U. Park), 226–238 (2007)
finite element method
Inelastic Fracture Mechanics for Tire Durability Simulations (Michael Kaliske, Bastian Näser, and Christian Meiners), 239–250 (2007)
finite element methods
A Finite Element Approach to the Transient Dynamics of Rolling Tires with Emphasis on Rolling Noise Simulation (Maik Brinkmeier, Udo Nackenhorst, and Heiner Volk), 165–182 (2007)
finite elements
Load and Inflation Effects on Force and Moment of Passenger Tires Using Explicit Transient Dynamics (Hon H. Liu), 41–55 (2007)
Computational Model to Investigate the Sound Radiation from Rolling Tires (Jan Biermann, Otto von Estorff, Steffen Petersen, and Holger Schmidt), 209–225 (2007)
fishhook test
The Impact of Plus-Sized Wheel/Tire Fitment on Vehicle Stability (J. W. Daws, R. E. Larson, and J. C. Brown), 23–40 (2007)
force
Load and Inflation Effects on Force and Moment of Passenger Tires Using Explicit Transient Dynamics (Hon H. Liu), 41–55 (2007)
fracture energy
Dynamic Fracture of Natural Rubber (Ali A. Al-Quraishi and Michelle S. Hoo Fatt), 252–275 (2007)
fracture mechanics
Inelastic Fracture Mechanics for Tire Durability Simulations (Michael Kaliske, Bastian Näser,

and Christian Meiners), 239–250 (2007)
frequency
Prediction of Tread Pattern Wear by an Explicit Finite Element Model (J. C. Cho and B. C. Jung), 276–299 (2007)
fuel economy
Fidelity of J1269 and J2452 (James A. Popio and John R. Luchini), 94–117 (2007)
gyroscopic eigenvalue problem
A Finite Element Approach to the Transient Dynamics of Rolling Tires with Emphasis on Rolling Noise Simulation (Maik Brinkmeier, Udo Nackenhorst, and Heiner Volk), 165–182 (2007)
handling
Load and Inflation Effects on Force and Moment of Passenger Tires Using Explicit Transient Dynamics (Hon H. Liu), 41–55 (2007)
high modulus
Basic Study of PK Fiber Tire Cord (Yugo Zuigyo and Masahiko Yamamoto), 317–325 (2007)
high tenacity
Basic Study of PK Fiber Tire Cord (Yugo Zuigyo and Masahiko Yamamoto), 317–325 (2007)
ice
Measuring Lateral Tire Performance on Winter Surfaces (G. Phetteplace, S. Shoop, and T. Slagle), 56–68 (2007)
imperfection
Finite Element Analysis of Nonuniformity of Tires with Imperfections (K. M. Jeong, K. W. Kim, H. G. Beom, and J. U. Park), 226–238 (2007)
inelastic material properties
Inelastic Fracture Mechanics for Tire Durability Simulations (Michael Kaliske, Bastian Näser, and Christian Meiners), 239–250 (2007)
infinite elements
Computational Model to Investigate the Sound Radiation from Rolling Tires (Jan Biermann, Otto von Estorff, Steffen Petersen, and Holger Schmidt), 209–225 (2007)
Lagrangian
Validation of a Steady-State Transport Analysis for Rolling Treaded Tires (J. Qi, J. R. Herron, K. H. Sansalone, W. V. Mars, Z. Z. Du, M. Snyman, and H. Surendranath), 183–208 (2007)
lateral traction
Measuring Lateral Tire Performance on Winter Surfaces (G. Phetteplace, S. Shoop, and T. Slagle), 56–68 (2007)
material force method
Inelastic Fracture Mechanics for Tire Durability Simulations (Michael Kaliske, Bastian Näser, and Christian Meiners), 239–250 (2007)
modal superposition
A Finite Element Approach to the Transient Dynamics of Rolling Tires with Emphasis on Rolling Noise Simulation (Maik Brinkmeier, Udo Nackenhorst, and Heiner Volk), 165–182 (2007)
moment
Load and Inflation Effects on Force and Moment of Passenger Tires Using Explicit Transient Dynamics (Hon H. Liu), 41–55 (2007)

motorcycle performance
Transient Response Simulation of an Off-Road Motorcycle with Conventional and Multicell Tire Inflation Mechanisms (Christopher M. Richards and Thomas Wade Summers), 2–22 (2007)
natural rubber
Dynamic Fracture of Natural Rubber (Ali A. Al-Quraishi and Michelle S. Hoo Fatt), 252–275 (2007)
NHTSA Star rating
The Impact of Plus-Sized Wheel/Tire Fitment on Vehicle Stability (J. W. Daws, R. E. Larson, and J. C. Brown), 23–40 (2007)
nitrogen inflation
Numerical Model for Nitrogen Tire Inflation (Kevin R. J. Ellwood, John Baldwin, and David R. Bauer), 300–316 (2007)
operational vibration
A Finite Element Approach to the Transient Dynamics of Rolling Tires with Emphasis on Rolling Noise Simulation (Maik Brinkmeier, Udo Nackenhorst, and Heiner Volk), 165–182 (2007)
oxidation
Numerical Model for Nitrogen Tire Inflation (Kevin R. J. Ellwood, John Baldwin, and David R. Bauer), 300–316 (2007)
plus-size tire fitment
The Impact of Plus-Sized Wheel/Tire Fitment on Vehicle Stability (J. W. Daws, R. E. Larson, and J. C. Brown), 23–40 (2007)
polyketone
Basic Study of PK Fiber Tire Cord (Yugo Zuigyo and Masahiko Yamamoto), 317–325 (2007)
radial force variation
Finite Element Analysis of Nonuniformity of Tires with Imperfections (K. M. Jeong, K. W. Kim, H. G. Beom, and J. U. Park), 226–238 (2007)
ride
Transient Response Simulation of an Off-Road Motorcycle with Conventional and Multicell Tire Inflation Mechanisms (Christopher M. Richards and Thomas Wade Summers), 2–22 (2007)
road surface texture
A Finite Element Approach to the Transient Dynamics of Rolling Tires with Emphasis on Rolling Noise Simulation (Maik Brinkmeier, Udo Nackenhorst, and Heiner Volk), 165–182 (2007)
rolling
Load and Inflation Effects on Force and Moment of Passenger Tires Using Explicit Transient Dynamics (Hon H. Liu), 41–55 (2007)
rolling contact
Validation of a Steady-State Transport Analysis for Rolling Treaded Tires (J. Qi, J. R. Herron, K. H. Sansalone, W. V. Mars, Z. Z. Du, M. Snyman, and H. Surendranath), 183–208 (2007)
rolling resistance
Fidelity of J1269 and J2452 (James A. Popio and John R. Luchini), 94–117 (2007)

rolling resistance and scrap tires
A Commented Synopsis of the Report of the Committee for the National Tire Efficiency Study (Marion G. Pottinger, Joseph D. Walter, and John D. Eagleburger), 70–93 (2007)
rolling tire noise
A Finite Element Approach to the Transient Dynamics of Rolling Tires with Emphasis on Rolling Noise Simulation (Maik Brinkmeier, Udo Nackenhorst, and Heiner Volk), 165–182 (2007)
SAE J-1269
Fidelity of J1269 and J2452 (James A. Popio and John R. Luchini), 94–117 (2007)
Modeling Transient Rolling Resistance of Tires (John R. Luchini and James A. Popio), 118–140 (2007)
SAE J-2452
Fidelity of J1269 and J2452 (James A. Popio and John R. Luchini), 94–117 (2007)
Modeling Transient Rolling Resistance of Tires (John R. Luchini and James A. Popio), 118–140 (2007)
slip angle
Load and Inflation Effects on Force and Moment of Passenger Tires Using Explicit Transient Dynamics (Hon H. Liu), 41–55 (2007)
Measuring Lateral Tire Performance on Winter Surfaces (G. Phetteplace, S. Shoop, and T. Slagle), 56–68 (2007)
snow
Measuring Lateral Tire Performance on Winter Surfaces (G. Phetteplace, S. Shoop, and T. Slagle), 56–68 (2007)
sound radiation
A Finite Element Approach to the Transient Dynamics of Rolling Tires with Emphasis on Rolling Noise Simulation (Maik Brinkmeier, Udo Nackenhorst, and Heiner Volk), 165–182 (2007)
standard reference condition
Fidelity of J1269 and J2452 (James A. Popio and John R. Luchini), 94–117 (2007)
steady-state transport
Validation of a Steady-State Transport Analysis for Rolling Treaded Tires (J. Qi, J. R. Herron, K. H. Sansalone, W. V. Mars, Z. Z. Du, M. Snyman, and H. Surendranath), 183–208 (2007)
tire
Load and Inflation Effects on Force and Moment of Passenger Tires Using Explicit Transient Dynamics (Hon H. Liu), 41–55 (2007)
tire cord
Basic Study of PK Fiber Tire Cord (Yugo Zuigyo and Masahiko Yamamoto), 317–325 (2007)
tire energy loss
Tire Energy Loss from Obstacle Impact (Timothy B. Rhyne and Steven M. Cron), 141–161 (2007)
tire inflation mechanisms
Transient Response Simulation of an Off-Road Motorcycle with Conventional and Multicell Tire Inflation Mechanisms (Christopher M. Richards and Thomas

Wade Summers), 2–22 (2007)
tire obstacle impact
Tire Energy Loss from Obstacle Impact (Timothy B. Rhyne and Steven M. Cron), 141–161 (2007)
tire road noise
Computational Model to Investigate the Sound Radiation from Rolling Tires (Jan Biermann, Otto von Estorff, Steffen Petersen, and Holger Schmidt), 209–225 (2007)
tire rolling loss
Modeling Transient Rolling Resistance of Tires (John R. Luchini and James A. Popio), 118–140 (2007)
tire rolling resistance
A Commented Synopsis of the Report of the Committee for the National Tire Efficiency Study (Marion G. Pottinger, Joseph D. Walter, and John D. Eagleburger), 70–93 (2007)
Modeling Transient Rolling Resistance of Tires (John R. Luchini and James A. Popio), 118–140 (2007)
tire uniformity
Finite Element Analysis of Nonuniformity of Tires with Imperfections (K. M. Jeong, K. W. Kim, H. G. Beom, and J. U. Park), 226–238 (2007)
torque
Load and Inflation Effects on Force and Moment of Passenger Tires Using Explicit Transient Dynamics (Hon H. Liu), 41–55 (2007)
torsion
Load and Inflation Effects on Force and Moment of Passenger Tires Using Explicit Transient Dynamics (Hon H. Liu), 41–55 (2007)
traction and rolling resistance
A Commented Synopsis of the Report of the Committee for the National Tire Efficiency Study (Marion G. Pottinger, Joseph D. Walter, and John D. Eagleburger), 70–93 (2007)
transient coastdown testing
Modeling Transient Rolling Resistance of Tires (John R. Luchini and James A. Popio), 118–140 (2007)
tread pattern
Validation of a Steady-State Transport Analysis for Rolling Treaded Tires (J. Qi, J. R. Herron, K. H. Sansalone, W. V. Mars, Z. Z. Du, M. Snyman, and H. Surendranath), 183–208 (2007)
tread pattern wear
Prediction of Tread Pattern Wear by an Explicit Finite Element Model (J. C. Cho and B. C. Jung), 276–299 (2007)
vehicle stability
The Impact of Plus-Sized Wheel/Tire Fitment on Vehicle Stability (J. W. Daws, R. E. Larson, and J. C. Brown), 23–40 (2007)
wear and rolling resistance
A Commented Synopsis of the Report of the Committee for the National Tire Efficiency Study (Marion G. Pottinger, Joseph D. Walter, and John D. Eagleburger), 70–93 (2007)
wear rate equation
Prediction of Tread Pattern Wear by an Explicit Finite Element Model (J. C. Cho and B. C. Jung), 276–299 (2007)

winter surfaces
Measuring Lateral Tire Performance on Winter Surfaces (G. Phetteplace, S. Shoop, and T. Slagle), 56–68 (2007)

yawing
Load and Inflation Effects on Force and Moment of Passenger Tires Using Explicit Transient Dynamics (Hon H. Liu), 41–55 (2007)
